

Jahson The Scientist Biog

Jahson The Scientist is a “wordsmen” who see’s no limit to his form of expression. *“I’m an artist I paint brains, most fitting, I’m a scientist”*. He is a lyricist who uses no standard formula and embraces many genres of music. When creating in his lab, **The Scientist** works with the elements of love, truth, fun and peace and binds them in aether. His visions of knowing self and fully living drive him to express his soul and vent it to yours.

He performs and jams with producers and musicians, from programmed beats to live instruments or naked words. His lyrics deal with the riddle of Adam from atoms, culture, science and the spirit.

His first public performance was on a school stage with his own band.

The steps from there have led him to perform before:

- The Roots
- Inner Circle
- GZA (Wu Tang Clan)
- Jeru The Damaja and others

And with:

- Oroh Angiama (MD for Corinne Bailey Rae)
- SK Invitational (16 Piece Hip Hop/Jazz Big Band)
- Ear Infection (8 man Dj Crew)
- Ty (Mercury Prize Nominee)
- Psychic Phenomena (UK Hip Hop Award Winners)
